In 2022, campaign group Fashion Revolution Chelsea dye garden for its Chelsea Flower Show presentation. An ancient craft, natural dyeing is a practice whose time has come again, with hand tie-dyed fashion also making a comeback in recent years.

The revival has been encouraged by Covid lockdowns, "which allowed people to explore the craft at home," says natural-dyeing enthusiast and teacher Susan Dye. It's unlikely, though, that the practice would have caught on in quite the same way if not for a continually growing discomfort about fashion's heavy footprint. From carbon emissions to animal cruelty, fashion is under considerable inspection. "Put it this way, 97% of dyes used in the industry are petrochemically (石油化学产品) based," says sustainable fashion consultant Jackie Andrews, who

helped advise the UN Ethical Fashion Initiative. “We’ve got net zero targets which mean we’re going to have to remove all those petrochemicals from the manufacturing cycle.”

Fashion is a huge polluter. According to the UN Environment Program, the industry is responsible for up to one-fifth of all industrial water pollution — due to the fact that most clothes today are produced in poorer countries where regulation is weak and enforcement weaker still. Waste water is dumped directly into rivers and streams, poisoning the land as well as the water sources of people and animals who rely on them.

It’s easy to see why someone who cares about people, planet and animals, as well as clothes, might turn to natural plant dyeing. From the beauty of the raw materials-often wild plants-to the property of only bonding with natural fiber like cotton and linen, from the minor footprint of upcycling old clothing that has grayed or faded over time to the vibrant and long-lasting dyeing results, plant dyeing feels like **a quiet act of rebellion**. This is why, while beginners start with simply changing their clothes’ color, new worlds open. Many of today’s natural dyers grow their own dye plants, run local community workshops, and advocate for change in industrialized fashion systems and beyond.

12. What is the main reason for the growing discomfort mentioned in paragraph 2?

- A. The adoption of petrochemical-based dyes.
- B. The challenging net zero targets to be achieved.
- C. The fashion industry’s focus on luxurious designs.
- D. The disturbing consequences of the fashion industry.

13. The author illustrates “Fashion is a huge polluter” by _____.

- A. making a comparison
- B. giving examples
- C. listing numbers
- D. introducing a new topic

14. What does the underlined phrase “a quiet act of rebellion” in paragraph 4 refer to?

- A. A protest against turning to natural fiber.
- B. An objection to upcycling old clothing.
- C. A struggle for a sustainable fashion industry.
- D. A resistance to vibrant colors in natural dyeing.

15. What would be the most suitable title for the passage?

- A. The Environmental Impact of Natural Dyeing
- B. Fashion Revolution’s Dye Garden Presentation
- C. The Return of Natural Dyeing with Ethical Appeal
- D. The Petrochemical Dye Industry and Its Challenges

Some pals and I were in the midst of a pinball competition at a bar the other night when the machine kept breaking down. We called over a very busy employee who's responsible for helping keep the place running. He put everything aside to fix our problematic pinball machine twice. 16 A couple of the guys immediately objected, saying the employee was just doing the job he was paid to do. I insisted and got the group to agree to the plan, although somewhat reluctantly.

My pinball wizard didn't stretch out his hand, but how many times have we run across those payment screens that suggest a 20% tip for being handed a sandwich we ordered? 17 There is data to back up the trend: 66% of American adults have a negative view of tipping, and 32% say they're sick of those payment-screen hints, according to a recent Bankrate survey.

18 I admit there are times I suspect the tipping thing has gone too far - say, when I'm at a self-checkout line and there's still request to leave something extra. But I'm generally willing to err on the side of caution: If someone is expecting a tip, I'll assume they have financial reasons to do so. 19

Plus, tipping is good karma (因果报应). It's always worth it to tip in unexpected situations- ones that don't necessarily involve a hint on a payment screen. 20 He was so grateful for the \$10 tip that later that night, he rewarded our group with well more than \$10 in free tokens (代金券) for future play.

So next time, there must be no arguments with my friends when times come to tip.

- A. This leads to what's been called "tipping fatigue (疲劳)"
- B. So, why am I willing to go against the trend and say yes?
- C. I suggested we tip him \$10 and split the tip among all of us.
- D. There's an argument that we should ban tipping altogether.
- E. Guess what happened next with my pinball-machine fixer at the bar?
- F. One dollar or two won't make or break me, but it can possibly help with their rent.
- G. Should they earn far below the minimum wage, employers must make up the difference.

Lily was renowned for her desire to achieve perfection in everything she undertook. Whether it was school projects, art assignments, or even helping her parents with household chores, Lily's commitment to excellence was unwavering.

One sunny summer day, Lily's family decided to spend a day at the beach. As they arrived, Lily's eyes were immediately drawn by a group of children who playfully built and then tore down their sandcastles. They giggled and shouted, their excitement on full display. "How silly," she thought, not quite getting why they enjoyed doing that.

Lily, being herself, decided to build a perfect sandcastle that would become the envy of all beachgoers. She began to plan every detail in her mind, from the balanced structures of the towers to the delicate decorations. Then, she set about piling sand to make the towers and walls of her sandcastle. Painstakingly, she crafted each feature of her work, carefully smoothed the surfaces and adjusting every detail to her vision.

Jake, Lily's younger brother, didn't seem too concerned with building a fantastic sandcastle. He picked a spot nearby and amused himself with the sand. He scooped up handfuls of sand, let it slip through his fingers like grains of time, and then molded it into careless shapes with the carefree abandon of a child. Jake's happiness was contagious. Mom and Dad joined him, laughing and joking over Jake's playful creations. From time to time, they called out to Lily and invited her to join the fun, knowing that the pursuit of perfection could be exhausting.

Nevertheless, Lily stayed where she was, determined to create an impressive sandcastle. She frowned at Jake's unconventional, abstract art-like sandcastle shapes and persisted in her efforts. However, the process didn't go as smoothly as she had anticipated. The sand didn't always hold its shape, and the waves constantly lapped at the edges of her creation.

Para 1: As the day wore on, Lily's sandcastle kept losing its form.

Para 2: With bitter smile, Lily decided to join her family.

Soaring to 29, 035 feet, the famous Mount Everest had long been considered unclimbable due to the freezing weather, the obvious potential fall from cliffs and the effects of the extreme high altitude, often called “mountain

sickness.” But that was to be changed by Edmund Hillary.

When he was invited to join the British Everest expedition in 1953, Edmund Hillary was a highly capable climber. The glacier-covered peaks in his hometown in New Zealand proved a perfect training ground for the Himalaya. It was his fourth Himalayan expedition in just over two years and he was at the peak of fitness.

On May 28, 1953, Edmund Hillary and Tenzing Norgay, an experienced Sherpa (夏尔巴人) set out and reached the South Summit by 9 a. m. next day. But after that, the ridge (山脊) slightly fell before rising suddenly in a rocky spur (尖坡) about 17 meters high just before the true summit. The formation is difficult to climb due to its extreme pitch because a mistake would be deadly. Scratching at the snow with his ax, Hillary managed to overcome this enormous obstacle, later to be known as the Hillary Step.

At 11:30 a. m, the two men found themselves standing at the top of the world. “Not until we were about 50 feet of the top was I ever completely convinced that we were actually going to reach the summit.” Hillary later recounted, “Of course I was very, very pleased to be on the summit, but my first thought was a little bit of surprise. After all, this is the ambition of all mountaineers.”

Emerging as the first to summit Mount Everest, Hillary continued by helping explore Antarctica, and establishing the Himalayan Trust (信托基金), through which he provided a number of beneficial services to the Himalayan peoples. He also a sizeable legacy that mountain climbers have chased ever since. As a young climber said, “It was not just Hillary and Tenzing that reached the summit of Mount Everest. It was all of humanity. Suddenly, all of us could go.”

With the availability of easy-to-use at-home kits, DNA testing for dogs has become increasingly popular among dog owners in recent years. It can provide invaluable insights into a dog's breed, health risks, and even behaviors.

DNA testing typically works by analyzing the genetic material found in a sample of cells taken from the inside

of your dog's cheek. This sample is then compared to a database of known breeds and genetic markers associated with certain traits or health conditions.

The first step in obtaining a DNA test kit is selecting which type you want. Most companies offer several different types of tests that vary in cost and complexity. For instance, some tests just analyze your dog's breed composition, while others can assess additional genetic markers associated with certain diseases or behaviors.

Then it's time to collect your dog's sample using the provided swab (拭子) kit or saliva-collection tube included with most kits. The swab should be gently rubbed inside your pet's cheek according to the kit's directions before being placed into the collection container provided by the company. After collecting the sample, it should be mailed back to the laboratory for processing according to instructions given by the company providing the service. Once received by the lab, it typically takes 1-2 weeks for results to be processed and sent back via email or mail. Results will vary depending on which type of test was purchased, but they generally include detailed information about your pet's breed composition as well as any potential health risks or behavioral traits associated with their genetics that could affect their overall well-being and quality of life.

If you're looking for an easy way to learn more about your pup's background without spending too much money, then DNA testing might just be right up your alley.

8. What is the primary purpose of DNA testing for dogs?

- A. To identify a dog's personality traits.
- B. To reveal a dog's future behavioral changes.
- C. To determine a dog's socialization preferences.
- D. To obtain a dog's breed and genetic information.

9. How does DNA testing for dogs typically work?

- A. By analyzing the dog's hair and fur.
- B. By conducting a blood test on the dog.
- C. By matching the dog's DNA with a database.
- D. By studying the dog's genetic health history.

10. What is the correct order of having an DNA test?

- ①get the sample processed ②rub the swab gently ③receive the result
- ④select the type of test ⑤place the swab into the container ⑥mail the sample back to the lab
- A. ④-②-⑤-⑥-①-③
 - B. ④ ⑤-①-②-⑥-③
 - C. ②-⑤-④-①-⑥-③
 - D. ②-④-⑤-⑥-①-③

11. What is the text?

【9 题详解】

细节理解题。根据第二段 “DNA testing typically works by analyzing the genetic material found in a sample of cells taken from the inside of your dog’s cheek. This sample is then compared to a database of known breeds and genetic markers associated with certain traits or health conditions. (DNA 检测通常通过分析从狗脸颊内侧提取的细胞样本中发现的遗传物质来进行。然后将该样本与已知品种和与某些性状或健康状况相关的遗传标记的数据库进行比较。)” 可知，对狗的 DNA 检测通常是通过将狗的 DNA 与数据库进行比对。故选 C。

【10 题详解】

细节理解题。根据第三段 “The first step in obtaining a DNA test kit is selecting which type you want. (获得 DNA 检测试剂盒的第一步是选择你想要的类型。)” 和第四段 “Then it’s time to collect your dog’s sample using the provided swab (拭子) kit or saliva-collection tube included with most kits. In 2022, campaign group Fashion Revolution Chelsea dye garden for its Chelsea Flower Show presentation. An ancient craft, natural dyeing is a practice whose time has come again, with hand tie-dyed fashion also making a comeback in recent years.

The revival has been encouraged by Covid lockdowns, “which allowed people to explore the craft at home,” says natural-dyeing enthusiast and teacher Susan Dye. It’s unlikely, though, that the practice would have caught on in quite the same way if not for a continually growing discomfort about fashion’s heavy footprint. From carbon emissions to animal cruelty, fashion is under considerable inspection. “Put it this way, 97% of dyes used in the industry are petrochemically (石油化学产品) based,” says sustainable fashion consultant Jackie Andrews, who helped advise the UN Ethical Fashion Initiative. “We’ve got net zero targets which mean we’re going to have to remove all those petrochemicals from the manufacturing cycle.”

Fashion is a huge polluter. According to the UN Environment Program, the industry is responsible for up to one-fifth of all industrial water pollution — due to the fact that most clothes today are produced in poorer countries where regulation is weak and enforcement weaker still. Waste water is dumped directly into rivers and streams, poisoning the land as well as the water sources of people and animals who rely on them.

It’s easy to see why someone who cares about people, planet and animals, as well as clothes, might turn to natural plant dyeing. From the beauty of the raw materials-often wild plants-to the property of only bonding with natural fiber like cotton and linen, from the minor footprint of upcycling old clothing that has grayed or faded over time to the vibrant and long-lasting dyeing results, plant dyeing feels like **a quiet act of rebellion**. This is why,

while beginners start with simply changing their clothes' color, new worlds open. Many of today's natural dyers grow their own dye plants, run local community workshops, and advocate for change in industrialized fashion systems and beyond.

12. What is the main reason for the growing discomfort mentioned in paragraph 2?

- A. The adoption of petrochemical-based dyes.
- B. The challenging net zero targets to be achieved.
- C. The fashion industry's focus on luxurious designs.
- D. The disturbing consequences of the fashion industry.

13. The author illustrates "Fashion is a huge polluter" by _____.

- A. making a comparison
- B. giving examples
- C. listing numbers
- D. introducing a new topic

14. What does the underlined phrase "a quiet act of rebellion" in paragraph 4 refer to?

- A. A protest against turning to natural fiber.
- B. An objection to upcycling old clothing.
- C. A struggle for a sustainable fashion industry.
- D. A resistance to vibrant colors in natural dyeing.

15. What would be the most suitable title for the passage?

- A. The Environmental Impact of Natural Dyeing
- B. Fashion Revolution's Dye Garden Presentation
- C. The Return of Natural Dyeing with Ethical Appeal
- D. The Petrochemical Dye Industry and Its Challenges

【答案】 12. D 13. B 14. C 15. C

【解析】

【导语】 本文是说明文。文章主要介绍天然染色工艺的回归。

【12 题详解】

细节理解题。根据第二段 "It's unlikely, though, that the practice would have caught on in quite the same way if not for a continually growing discomfort about fashion's heavy footprint. From carbon emissions to animal cruelty, fashion is under considerable inspection. (然而,如果不是因为人们对时尚的沉重足迹不断感到不安,这种做法不太可能以同样的方式流行起来。从碳排放到虐待动物,时尚都受到了广泛的关注。)" 可知,时尚业也存在碳排放到虐待动物问题,所以人们感到不适是因为时尚产业令人不安的后果。故选 D。

【13 题详解】

推理判断题。根据第三段 “Fashion is a huge polluter. According to the UN Environment Program, the industry is responsible for up to one-fifth of all industrial water pollution — due to the fact that most clothes today are produced in poorer countries where regulation is weak and enforcement weaker still. Waste water is dumped directly into rivers and streams, poisoning the land as well as the water sources of people and animals who rely on them. (时尚是一个巨大的污染源。根据联合国环境规划署的数据, 该行业造成了高达五分之一的工业水污染, 因为目前大多数服装都是在监管薄弱、执法力度更弱的贫穷国家生产的。废水被直接倾倒入河流和溪流中, 毒害了土地以及依赖它们的人和动物的水源。)” 可知, 这一段利用实际例子来说明时尚是一个巨大的污染源。故选 B。

【14 题详解】

词句猜测题。根据第四段 “It’s easy to see why someone who cares about people, planet and animals, as well as clothes, might turn to natural plant dyeing. From the beauty of the raw materials-often wild plants-to the property of only bonding with natural fiber like cotton and linen, from the minor footprint of upcycling old clothing that has grayed or faded over time to the vibrant and long-lasting dyeing results, plant dyeing feels like **a quiet act of rebellion**. (很容易理解为什么一个关心人、地球、动物以及衣服的人会转向天然植物染色。从原料的美丽(通常是野生植物)到只与棉花和亚麻等天然纤维结合的特性, 从随着时间的推移变灰或褪色的旧衣服的微小足迹到充满活力和持久的染色效果, 植物染色感觉就像是 a quiet act of rebellion。)” 可知, 这里是描述指物染色和化学染色不一样, 所以它是对化学染色的反抗, 是对可持续发展的维护。a quiet act of rebellion 的意思应该是 “为可持续发展而做的斗争”, 和选项 C 意思一致。故选 C。

【15 题详解】

主旨大意题。根据第一段 “In 2022, campaign group Fashion Revolution Chelsea dye garden for its Chelsea Flower Show presentation. An ancient craft, natural dyeing is a practice whose time has come again, with hand tie-dyed fashion also making a comeback in recent years. (2022 年, 时尚革命运动组织切尔西染料花园在切尔西花展上亮相。天然染色是一种古老的工艺, 它的时代又来了, 近年来手工扎染的时尚也卷土重来。)” 可知, 这篇文章主要介绍天然染色工艺的回归, C 项 “天然染色的回归与伦理诉求” 符合文意。故选 C。

第二节(共 5 小题;每小题 2.5 分, 满分 12.5 分)

阅读下面短文, 从短文后的选项中选出可以填入空白处的最佳选项。选项中有两项为多余选项。

Some pals and I were in the midst of a pinball competition at a bar the other night when the machine kept breaking down. We called over a very busy employee who’s responsible for helping keep the place running. He put everything aside to fix our problematic pinball machine twice. 16 A couple of the guys immediately objected, saying the employee was just doing the job he was paid to do. I insisted and got the group to agree to the

plan, although somewhat reluctantly.

My pinball wizard didn't stretch out his hand, but how many times have we run across those payment screens that suggest a 20% tip for being handed a sandwich we ordered? 17 There is data to back up the trend: 66% of American adults have a negative view of tipping, and 32% say they're sick of those payment-screen hints, according to a recent Bankrate survey.

18 I admit there are times I suspect the tipping thing has gone too far - say, when I'm at a self-checkout line and there's still request to leave something extra. But I'm generally willing to err on the side of caution: If someone is expecting a tip, I'll assume they have financial reasons to do so. 19

Plus, tipping is good karma (因果报应). It's always worth it to tip in unexpected situations- ones that don't necessarily involve a hint on a payment screen. 20 He was so grateful for the \$10 tip that later that night, he rewarded our group with well more than \$10 in free tokens (代金券) for future play.

So next time, there must be no arguments with my friends when times come to tip.

- A. This leads to what's been called "tipping fatigue (疲劳)"
- B. So, why am I willing to go against the trend and say yes?
- C. I suggested we tip him \$10 and split the tip among all of us.
- D. There's an argument that we should ban tipping altogether.
- E. Guess what happened next with my pinball-machine fixer at the bar?
- F. One dollar or two won't make or break me, but it can possibly help with their rent.
- G. Should they earn far below the minimum wage, employers must make up the difference.

(有数据支持这一趋势：根据 Bankrate 最近的一项调查，66% 的美国成年人对小费持负面看法，32% 的人说他们厌倦了付款屏幕上的暗示)” 说明人们不愿给小费已经成为了一种趋势。下文 “I admit there are times I suspect the tipping thing has gone too far - say, when I’m at a self-checkout line and there’s still request to leave something extra.(但是我一般都会谨慎行事：如果有人想要小费，我会假设他们是出于经济原因这样做的)” 说明作者原意给小费的理由。空处承接上文引出下文。B 项中的 “I willing to go against the trend ” 和上文 “There is data to back up the trend” 相呼应，并引出作者原意违反这一趋势的原因。故选 B。

【19 题详解】

上文 “But I’m generally willing to err on the side of caution: If someone is expecting a tip, I’ll assume they have financial reasons to do so. (但是我一般都会谨慎行事：如果有人想要小费，我会假设他们是出于经济原因这样做的)” 说明有人想要小费是有原因的。空处承接上文，表明小费对于他们的重要性。F 项 “一两块钱不能决定我的成败，但也许能帮他们付房租。” 符合语境。故选 F。

【20 题详解】

第二节(满分 25 分)

47. 阅读下面材料, 根据其内容和所给段落开头语续写两段, 使之构成一篇完整的短文。

Lily was renowned for her desire to achieve perfection in everything she undertook. Whether it was school projects, art assignments, or even helping her parents with household chores, Lily's commitment to excellence was unwavering.

One sunny summer day, Lily's family decided to spend a day at the beach. As they arrived, Lily's eyes were immediately drawn by a group of children who playfully built and then tore down their sandcastles. They giggled and shouted, their excitement on full display. "How silly," she thought, not quite getting why they enjoyed doing that.

Lily, being herself, decided to build a perfect sandcastle that would become the envy of all beachgoers. She

began to plan every detail in her mind, from the balanced structures of the towers to the delicate decorations. Then, she set about piling sand to make the towers and walls of her sandcastle. Painstakingly, she crafted each feature of her work, carefully smoothed the surfaces and adjusting every detail to her vision.

Jake, Lily's younger brother, didn't seem too concerned with building a fantastic sandcastle. He picked a spot nearby and amused himself with the sand. He scooped up handfuls of sand, let it slip through his fingers like grains of time, and then molded it into careless shapes with the carefree abandon of a child. Jake's happiness was contagious. Mom and Dad joined him, laughing and joking over Jake's playful creations. From time to time, they called out to Lily and invited her to join the fun, knowing that the pursuit of perfection could be exhausting.

Nevertheless, Lily stayed where she was, determined to create an impressive sandcastle. She frowned at Jake's unconventional, abstract art-like sandcastle shapes and persisted in her efforts. However, the process didn't go as smoothly as she had anticipated. The sand didn't always hold its shape, and the waves constantly lapped at the edges of her creation.

Para 1: As the day wore on, Lily's sandcastle kept losing its form.

Para 2: With bitter smile, Lily decided to join her family.

【答案】As the day wore on, Lily's sandcastle kept losing its form. Despite her best efforts to mold and shape the sand, the waves and the wind seemed determined to undo her hard work. Frustration started to creep in as she watched her masterpiece crumble time and time again. Determined not to give up, Lily redoubled her efforts, trying to salvage what was left of her sandcastle. But no matter how hard she tried, the elements seemed to conspire against her. The once-perfect sandcastle now resembled a lopsided ruin, a stark reminder of her failed attempt at perfection.

With bitter smile, Lily decided to join her family. Sitting down next to Jake, she observed his carefree laughter and the joy on her parents' faces. For the first time that day, she realized that perhaps there was more to life than striving for perfection. In that moment, Lily made a choice. She let go of her obsession with the sandcastle and

joined in the fun. She laughed, played, and created sandcastles without the burden of expectations. It was in that moment that she truly began to understand the beauty of imperfection and the importance of enjoying the simple things in life.
